Real Problem

- There are so many sources which provides the news and also in them we can not decide which is true and which is not.
- Investors has to go through different sites and app to gather all the information they want to do the business.

Problem Statement

- An open-source data platform that allows investors and lenders to gain access to relevant information from corporate reporters and other data sources (eg., business today and economic times).

Our Approach

- We have built a single stop website where all the investors and traders can get the relevant information.

Let's Look At the Product !

Website Link :

<https://lospolloshermanos-hasks.github.io/aalekh/#/>

Tech Stack used

- **React Js**
- **Firebase**
- **Bootstrap**

Los Pollos Hermanos

Anuj
Frontend Developer

Harshal
Frontend Developer

Keyur
Content Designer

Shivang
Content Designer

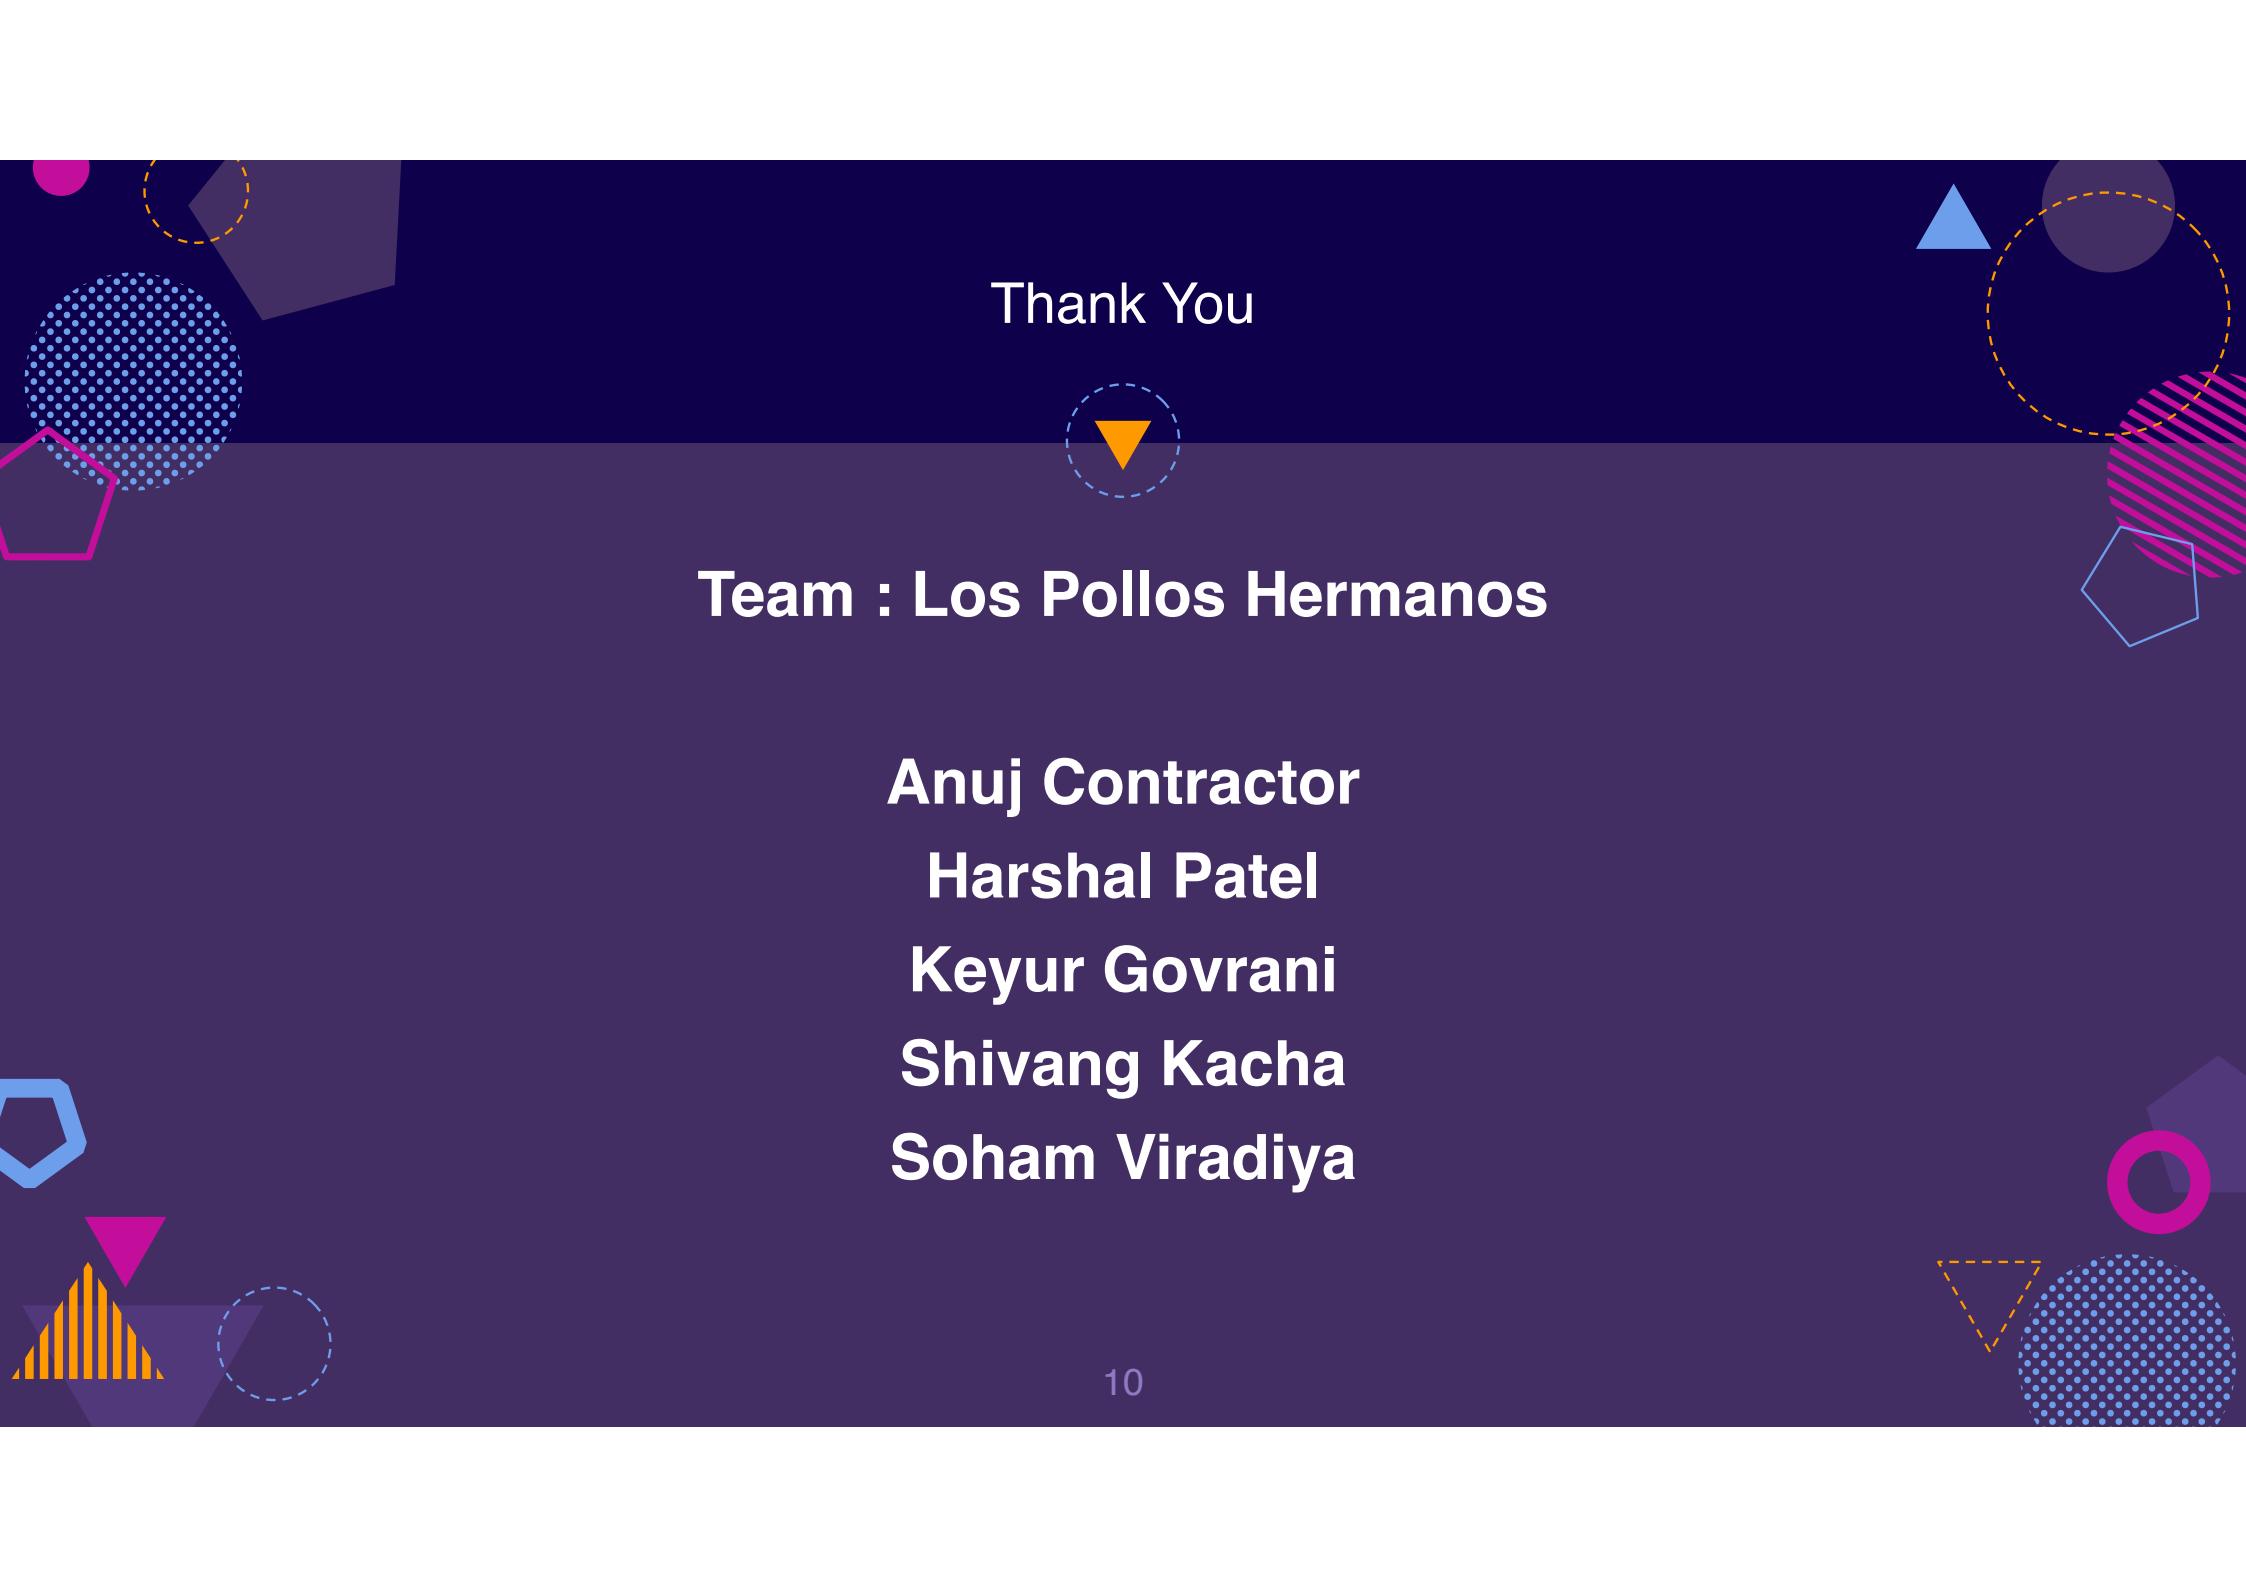

Soham
Backend Developer

Business Model

- **Subscription based system**
- **Ads on the website**

Future Improvements we are planning

- Add data about Real estate
- Add stocks screener & Tax calculator
- Eventually make a mobile application

Thank You
